

PROOF OF CONCEPT+

A pilot project created for companies, who would like to implement modern analytical solutions and gain a competitive advantage.

PoC+ = Proof of Concept+

A data analysis tool that will work for your company - test for free for 30 days!

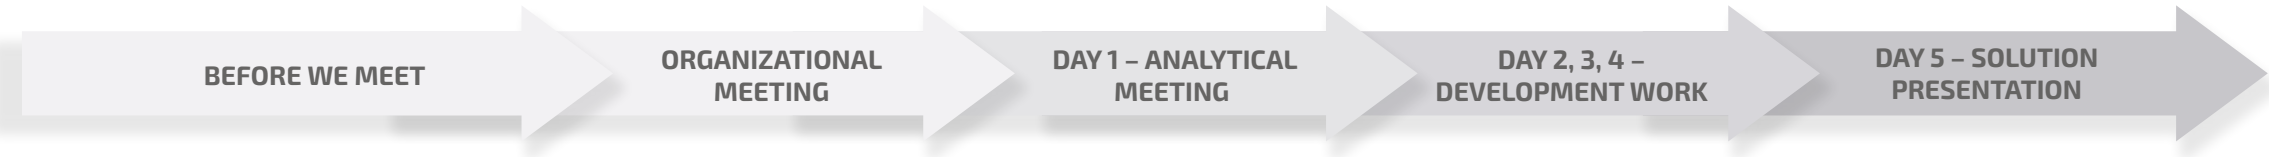

How to test a **Business Intelligence** system? How to see on your own that this investment is a hit? How to start? We have the solution!

Introducing **PoC+**, a pilot project designed for companies that would like to implement modern analytical solutions and increase competitiveness by 100%. Thanks to **PoC+**, you can get acquainted with a selected BPX product on the example of the most relevant data or reports. We will prepare a ready-made analytical application that will focus on the specific business situation of your company.

SEE ON YOUR OWN HOW OUR SOLUTION CAN SOLVE THE PROBLEMS OF YOUR ORGANIZATION.

PoC+ Implementation process

CUSTOMER TASKS

Specify the business challenges to be addressed by PoC+

- which data sources would you like to see in the tool?
- perhaps ones that have been most problematic so far?

Specify data sources

- our consultant will help determine what documents will be necessary to solve your issue (Excel files: indexes, prices, sales reports etc.), the range of data will be verified - PoC+ must fit in 5 days.

Determine the number of users

- create a team that will test the solution,
- the number of users must not exceed 30 people.

CUSTOMER TASKS

- tell us what you expect from us - specify your business and technical goals,
- set with us the most convenient PoC+ start and completion date,
- determine the deadline for submission of materials for analysis.

BPX TASKS

- we will assign you a guardian responsible for conducting PoC+ in your company,
- we will determine the details of architecture (cloud or server),
- we will prepare the configuration of system environment.

CUSTOMER TASKS

- discuss with us what product features you want to see,
- discuss with us previously provided materials,
- introduce us your team that will evaluate the solution.

BPX TASKS

- we will discuss with you functionality of the application,
- we will collect complementary information - business and technical - necessary for conduct PoC+,
- we will present inspirations from our previous projects.

CUSTOMER TASKS

- consider new opportunities for analyzing company data,
- imagine new paths of development.

BPX TASKS

- we analyze all information received from you,
- for three days we prepare the best solution using appropriate tools.

CUSTOMER TASKS

- here are the keys to the system - modern data analysis is at your disposal,
- 30-days period of use is starting.

BPX TASKS

- we present a ready-made solution - at your premises or remotely,
- we explain how to use the tool and we answer all your questions,
- we are available for the entire trial period (as well as at a further stage of cooperation).

PoC+ Pathways

DEFAULT VERSION CLOUD QS

(for customers using cloud computing)

We will prepare Qlik Sense testing environment for your company

- provide your email address,
- you will receive a trial version of Qlik Sense Enterprise SaaS for 30 days (extendable +15 days),
- further configuration will take place during a 20-minute meeting with a consultant, via communicator

ALTERNATIVE LOCAL QS VERSION

(for customers with own server environment)

If you have a server for software installation, you will need:

- basic configuration (virtual machine),
- Windows 2016 or later,
- 16 GB RAM, 200 GB HDD,
- 4 processor cores.

- server can be on or off the domain - test users can be downloaded from the domain or will be created locally on the server,
- if the server will not have access to the Internet, please inform us about this situation before the work begins,
- you will receive a trial version of Qlik Sense Enterprise SaaS for 30 days (extendable +15 days).

ACCESS REQUIREMENTS

For a successful implementation, our consultant will need to collect:

- named account in the domain or locally with local administrator rights on the PoC+ server,
- a QService account in the domain or locally that will serve as the main service account for the Qlik Sense server with local administrator rights on the PoC+ server,
- a VPN account for the consultant, if access to the server requires it,
- passwords for the above accounts will be sent to the BPX consultant before the work begins,
- remote access to the server must be provided to the consultant at least 3 days before the start of the work,
- during the project consultant works exclusively on the client's server through the remote desktop functionality (built-in functionality of the Windows Server system).

IMPLEMENTATION OF PoC+ Restrictions (QS)

- the consultant will limit the amount of data to fit within the hardware requirements of the virtual machine running for the project,
- if the functional requirements will be wider than feasible within 3 working days then the BPX consultant will reduce the list of functionalities to those feasible within this timeframe (informing the client),
- list of metrics/KPIs and measurements. PoC+ application will contain up to 10 measurements and 10 metrics/KPIs,
- the application will consist of up to 3-4 report screens,
- the application will use standard Qlik Sense components, no additional modules or extensions will be used.

Every discovery, invention and journey begin with **a conversation**
